AccuSeed Nutrient Grade Sulphur (90%S)

Product Description

Seeding technology has advanced with the dawn of AccuSeed™ Nutrient Grade Sulphur. AccuSeed™ Nutrient Grade Sulphur technology allows the grower to more accurately plant canola and other small seeded crops with little worry about over or under applications with their seeding operations.

AccuSeed™ Nutrient Grade Sulphur consists of uniformly prilled degradable elemental sulphur pastilles. AccuSeed™ Nutrient Grade Sulphur is safe to use and will not damage emerging crops. (i.e. very low salt index). A normal fertility program should be used in conjunction with AccuSeed™ Nutrient Grade Sulphur to ensure optimum fertility levels.

Tiger-Sul Products recommends additional sulphur be used in conjunction with AccuSeed™ Nutrient Grade Sulphur to ensure proper sulphur fertility. Consult a professional crop advisor or local university extension professional for a recommended fertility program if required.

Guaranteed Analysis – 90% S				
Physical Properties				
Color	Pale Yellow-Green Color			
Fertilizer Prill Size	Mini Prill Turf Grade- 190 SGN			
Angle of Repose	29 Degrees			
Breakage Tests (% Fines Produced)	<0.5%			
Impact (SLI)	0.9%			
Abrasion (SLII)	0.07%			
Bulk Density (packed)	Mini Prill Turf Grade – 88 lbs/ft ³			
Package Sizing	Canada (Calgary Facility)		USA (Atmore Facility)	
	25kg bags	1000kg MBB	50 lb bags	2204 lb MBB
	Bulk Truck	Bulk Rail	Bulk Truck	Bulk Rail

Accuseed™ Nutrient Grade Sulphur Specifications

General Application and Use Recommendations

AccuSeed™ Nutrient Grade Sulphur can be blended with most small seeds for seed bulking requirements. Conduct a small scale test if unsure of compatibility of small seed source. Always maintain optimum plant stand populations required. See AccuSeed Recommendation sheet for full recommendations and application details.

Handling and Storage

AccuSeed™ Nutrient Grade Sulphur will blend and store well with other granular fertilizer products. Accepted blending and handling procedures should be followed when using AccuSeed™ Nutrient Grade Sulphur. Good housekeeping is necessary when handling sulphur products. Tiger-Sul Products uses a special anti-dust agent to minimize air borne dust. Always use stringent dust control procedures to prevent concentrated flammable dusts from reaching a spark or flame source. Sulphur materials should not be blended and stored with strong oxidizing agents such as ammonium nitrate. Avoid extensive use of augers due to fracturing of the product.

First Aid

Skin Contact: Wash with mild soap and water.

Eyes: Irrigate thoroughly with copious quantities of plain water. Inadequate irrigation may cause irritation.

Do not use Boric Acid.

Ingestion: Irritation may occur, seek medical attention.

Inhalation: Sulphur dust may irritate the mucous membranes of the respiratory passages.
